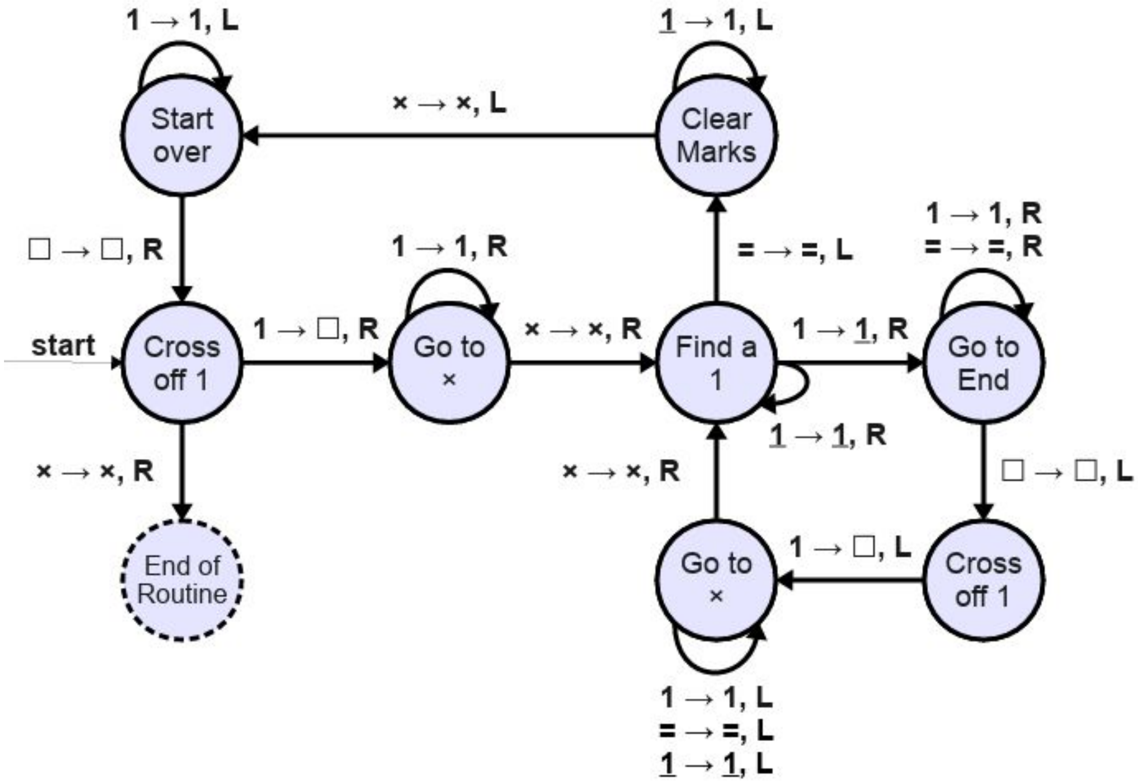
TM for L={$1^m x 1^n = 1^{mn}$ | Σ={1,x,=}* and m,n ∈ R}



TM for $L=\{1^m x 1^n = 1^{mn} \mid \Sigma=\{1,x,=\}^* \text{ and } m,n \in R\}$

If $m = 0$, we need to check that $p = 0$.

- Input then will have a form of $x1^n=1^p$

The accept state should match the regular expression of $x1^*=$.

Homework for bonus mark:

- Build a TM to check this.
